DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, drawn to a circuit for reducing east-west geometry mismatch, classified in class 315, subclass 371.
 - II. Claims 25-36, drawn to the method and apparatus for generating a horizontal sawtooth current, classified in class 315, subclass 364.
2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case method as disclosed in group 2 (claim 25), can be performed on the apparatus different than the one disclosed in group 1. For instance the method requires amplifying circuitry, and the apparatus disclosed in group I, does not have this element.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
